A Bibliographic History 1923-1998

by Jack L. Chalker & Mark Owings

Acclaimed as a landmark reference work when last produced in book form, this book, which has become the "Bible" for information used by hundreds of book dealers, libraries, collectors, and scholars as well as major libraries worldwide was also extremely expensive, and, in a decade where small presses emerge every month or so, the current updated version runs to more than 1100 8½ X 11 inch 10 point double-columned pages. making a new print edition extremely expensive. So, we did it on CD ROM instead! This CD is in industry standard data CD format. The entire book, with corrected and updated text, now has hundreds of full color illustrations and more than fifty new publishers covered. Because we used Adobe Acrobat® format it looks just like a printed book and you can print any chapter and it will look like the book. And we've used Acrobat Reader with Search so you can type in any story, author, or artist and find every title they are in using easy VCR-like controls. Windows 95/98/NT users even get Acrobat included! MacIntosh & Linux/Unixusers will have to open the files from within Acrobat (free download). From your bookseller or direct from The Mirage Press, Ltd. All copies shipped Priority Mail unless premium service is requested.
